DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to the product, classified in class 336, subclass 189.
 - II. Claims 21-38, drawn to a method of making the product, classified in class 336, subclass 188.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, e.g., using a single conductor to wind both coils, thereby obviating the need to form electrical connections between the two coils.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: I. Fig. 6

II. Fig. 7

III. Fig. 8

IV. Fig. 9

V. Fig. 4

VI. dipole magnet with brittle superconducting materials (not shown)

VII. plural layers of concentric pairs of dipole magnets (not shown)

VIII. Fig. 10

IX. Fig. 11

X. Fig. 12

XI. Fig. 13

XII. Fig. 14

XIII. Fig. 15

In Group I, claims 1-5, and 12 are generic.

Group II: XIV. Using multiple layers of concentric pairs of dipoles

XV. Forming a magnet of multipole order (Claims 28-35)

XVI. Replacing racetrack coils in magneto-hydrodynamic devices (Claim 36)

XVII. Inserting the dipole coils in a stator (Claim 37)

XVIII. Inserting dipole coils in the rotor (Claim 38)

In Group II, claims 21-25, and 27 are generic.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Brian Steinberger on 9/29/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
